

INTEGRATION BEE ROUND ONE: DEFINITE INTEGRALS

You will have **five minutes** to evaluate each of the fifteen definite integrals that will be displayed one at a time on this screen.

At the end of the two minutes, all hands must go up and judges will grade your answers immediately. If you wish to protest an answer, notify a grader before the next integral is displayed.

For each correct answer, you will receive one raffle ticket to be entered for prizes that will be drawn after dinner.

INTEGRATION BEE ROUND ONE: DEFINITE INTEGRALS

- You do **not** need to combine multiple logs or fractions with irrational numbers (e.g. π , e , $\ln 3$).

$$2 \ln 3 \checkmark, \ln 9 \checkmark$$

$$\frac{1}{e} + 2 \checkmark, \frac{1 + 2e}{e} \checkmark$$

- However, **not** a negative powers should remain.

$$e^{-1} \text{ X vs } \frac{1}{e} \checkmark$$

At most five participants will move onto the finals – to be determined by the total number of correct answers and tiebreaking criteria if necessary. **C**
